

Overview of Data Displays and Technology Infrastructure

First virtual meeting

- April 19th
- Wide variety of participants at various levels of system development and implementation
- Discussed framing questions and options for engaging virtual audiences

Options for engaging virtual audiences

- Before meeting:
 - Sharp objectives
 - Focused discussion
 - Specific requests for material review
- Action item list at the close of meeting
- Turn on video feed during meeting
- Start a shared space for member profiles and documents

Themes for core questions

- Visual displays of indicators
 - Show examples of individual and school level
 - Describe perceived use of each
 - Identify needed drilldown capabilities
- Technology
 - Data dashboards, software, merging data systems
- Predictive analytics
 - Examples from other fields
- Recording and tracking interventions/supports

Additional questions

- Dissemination: to students, families, and communities?
- Engagement: what actions should be elicited from each stakeholder?

Introductions

- Name
- Organization
- Role

Organizational purposes, needs and expectations for indicator and response systems

Similarities

Differences

Role/position needs and expectations for indicator and response systems

Similarities

Differences

Think about the framing questions for the data displays and technology work group in light of your responses above.

Challenges

Opportunities
